

Why your customers need the HPC Convertible Truarc Ring Pliers

Truarc Rings are found on lock cylinders and other mechanical assemblies. The rings are in a variety of sizes in both external and internal formats. Your customers need 1 pair of pliers that compresses internal rings and spreads external rings, and works on multiple sizes of rings.

How to sell the HPC Convertible Truarc Ring Pliers

Key Selling Points:

- ✦ These pliers easily convert from ring compressor to ring spreader, with the slide of the switch.
- ✦ They can be used on internal rings of .25 to 1inch and on external rings of .125 to 1inch.
- ✦ These pliers have an adjustable stop that limits the jaw opening, so that rings cannot be over compressed or over spread.
- ✦ To reach and manipulate the widest variety of rings, this kit includes 5 sets of replaceable tips including 3 different tip diameters and 2 different angles.

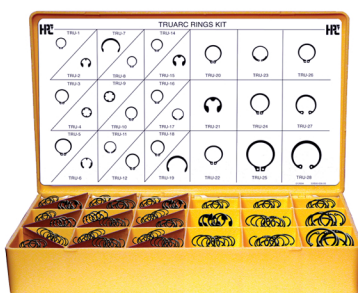

Tips included:

- 2 - Silver (0.047" / 1.2mm)
- 2 - Silver 90° angle (0.047" / 1.2mm)
- 2 - Black (0.036" / 0.9mm)
- 2 - Black 90° angle (0.036" / 0.9mm)
- 2 - Copper (0.023" / 0.6mm)

No. TRU-99

No. TRU-275

Don't forget that HPC also offers a Tru-Arc Ring Assortment as well as other Truarc Ring Spreaders and Compressors.
