

Norton Expands 5600 Hands-Free Kits Offering

Norton is pleased to add several hands-free kits using the new 5630 push side power operator.

These kits offer a simple and effective way to create a completely touchless environment. The NORTON 5600 Series Hands-Free Kits combine a wave-to-open switch with the 5600 power operator to open the door and provide a 'clean' exit without touching hardware. When used with automatic toilets, soap dispensers, sinks and dryers, the 5600 Hands-Free Kits provide the final piece of the puzzle for a touchless, germ free bathroom experience.

These kits aren't just for bathroom doors though. They can also be used to provide easy access on non-fire rated examination room doors and doors in laboratories or rehabilitation facilities.

The Norton 5600 Series Hands-Free Kits feature the 5600 Low Energy Operator with a wave-to-open wall switch that can be ordered alone or with an electric strike for openings using cylindrical or mortise locks.

How To Order

Model	Description	Kits Include
